The Sunday afternoon services were introduced by the usual songs, after which secretary W. A. Young led in prayer. Mr. Ludgate, producing his concertina, explained that he had accurated it as a souvenir of a trip to England, where the instrument is much used. In his address, Rev. Mr. Ludgate seid. In part:

"I have never in my life felt such an impulse to swear as I have since my solourn in Camp Cody. Possibly the reason is that I never in my life heard so much swearing. Everybody to make in Camp Cody, and even the Y. M. C. A. secretaries there have developed a line of adjectives and epithets which, while not strictly swearing, is a very close initiation to it. The fever has naturally extended issuif to the complete of the surfacest struggles of my life to oversome it.

Important Notice—

You probably have heard rumors regarding "Ground Glass" being in various kinds of food products, several products have been affected, and the government has been called upon to analyze and examine samples sent them by parties finding this glass, and the following is an article published on Friday, Feb. 22nd, in "The Washington Times," Washington, D. C.

"Glass In Candy' Tales Myths, Says Dep't. of Justice"

The Department of Justice today officially exploded the constantly recurring reports of ground glass plots that threatened the lives of soldiers in camps and cantonments or of city dwellers in many sections.

Each of these reports, generally started by the finding of a lot of glass or other substance in canned or bottled goods, or in candy (also chocolate) has been run down by agents of the Bureau of Investigation and the Army & Navy Intelligence Services. In no case has any fact been discovered to warrant reports of plots. In not a sin-

gle instance has even an attempted individual homicide been found. John Lord O'Brien, Special Assistant to the Attorney General, in charge of all work under the espionage and alien enemy acts, and A. Bruce Bielaski, head of the Bureau of Investigations, are authority for the statement that they are all myths."

This shows that there is absolutely nothing in these reports of plots, that if "Ground Glass" has been found, its presence in such products were as naturally an accident as might happen in the preparation of such products in the home, and in the interest of the manufacturers of all such products we publish the above report, which is authoritative, in order that the public may be informed fully.
